

Your Feedback Is Important

At our previous public information exchanges, you have provided input on what items are important to you. Here is what you said and our answers:

- **Will this decision affect the reindustrialization of the site?** We have commissioned a study to determine this. This study will be available in 2011.
- **How many local jobs would result from this decision?** Construction and operation of a cell would require 50-75 jobs. Recycling/Reuse could result in additional long-term jobs
- **What will future waste disposal cost?** The cost depends on the amount of waste generated and the method of disposal.
- **How will the decision affect land use at the site?** A new on-site waste disposal facility could use ~60 to ~120 acres, depending on the volume of waste and the height of the facility.
- **How will this decision affect the appearance of the site?** DOE is evaluating ways to minimize visual impact. See the poster in the Landfill Information Section for more information.
- **Can you do more to minimize waste through reuse and recycling?** DOE is committed to reducing waste through reuse and recycling efforts and will take steps to reduce the amount of waste materials.

**Please keep talking.
Your voice is being heard!**
